

Taxes, Do it yourself or not?

Turbo Tax and TaxAct, the two market leaders in Do It Yourself (DIY) tax software make up 78% of the DIY tax preparation market.

Here are 3 reasons to NOT do it yourself:

1. **Any time you have an unusual transaction** such as buying/selling real estate, exercising stock options, receiving an inheritance or rental and royalty income.
2. **If you own a business, Schedule C, partnership, S or C Corporation**, you should have your taxes done by a professional.
3. **If you are totally uncomfortable with taxes, numbers or software.**

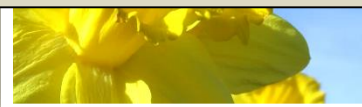

Do yourself a BIG favor and seek professional help if any of the above apply to your situation. (Source: www.Kiplinger.com)

Songs to Save a Life

The NY Presbyterian Hospital trains it's first responders with well known tunes to teach CPR timing. Adult CPR compressions need to be done at the right place, in the center of the chest between the nipples and at 100 beats a minute. This hospital has used several tunes to teach and maintain the proper rhythm. They often use the '70s classic – and aptly titled – Bee Gees song “Staying Alive” because it perfectly hits the 100 beats target. Apparently, there are several catchy songs that do the job. Keeping the songs in mind can make a difference.
